

Dear parents, I am a 29 year-old National Institute of Education (Singapore) trained female teacher with 5 years experience of teaching in a local school and 10 years experience of giving private tuition especially in Mathematics. I specialize in teaching children from 4 to 12 years old.

Passionate in the field of education and with the belief that every child is unique, I strive to develop personalized and engaging lessons to suit the needs of every child.

I am patient and am willing to listen and understand the child, thus building strong rapport with him/her. Complicating Mathematics problems can then be easily explained and less intimidating.

If you are interested, please contact me, Serena, at serena.lly@gmail.com or 97958920.
